Ссылка на памятку Ссылка на памятку Мы не можем вернуть ссылку на памятку.Lohtua sinine The lohtua sinine is a unique class of rock art in Taiwan. The lohtua sinine were etched by the aboriginal inhabitants of Taiwan who resided in the Hsienchuan and Pailiao mountainous regions of Taiwan. The lohtua sinine depict over one thousand images of animals, insects, and flowers, among other things. Lohtua sinine imagery and styles can be characterized by their exactness, and their patterns can be identified not just in the wild but also in the art galleries of Taiwan. The lohtua sinine are perhaps the best preserved examples of ancient rock art in the world. The Lohtua Sinine and its Protection Over the years, the government of Taiwan has adopted a rather hard stance toward the protection of the lohtua sinine. A large portion of the site has been eroded away by various causes. Many of the lohtua sinine suffer from foliage damage, insect infestation, and vandalism. In 2009, the government established a special branch of the Taiwan Environmental Protection Agency to safeguard the lohtua sinine. Conservation efforts have been relatively successful. Some of the lohtua sinine have been saved and placed in cultural museums. Still others f678ea99e
