. jstoone, bazhang: it was a synaptic update issue, and is fixed now, and is found in repositories now thanks to the guys who helped me i just installed the gnome3 preview on my ubuntu 9.04 anybody knows where I can find a snapshot of the current packages used by the karmic alpha 3 cd? I'd like to make a copy of it, because it's really broken Anyone know how I can set the screen saver on my HP Pavillion dv5000 laptop? there's no stable version out yet surgy: I see, then I shouldn't have to use it in the future. Just thought I'd point it out, since it's new in the repositories. fsl you may need to find a compatible windows driver, but im not very good at linux so cant really help you out, but i could recomend google and try some of the friends websites Firefish: change it in the screensaver applet Firefish: yup, that's it wilee-nilee: about to try ctrl+alt+f1 for now reiso: That's what I thought I did. I go to 'screensaver' and I don't see the screen saver there. any way to do this from an ssh session? surgy: I'm about to install myself so I'll be back in a few minutes if you have any more questions.. [-jon-]. No it does not open a virtual tty you might want to try #ubuntu-server wilee-nilee: right, I see that Firefish: probably not, you'd have to go system -> prefs -> power management there should be a screen saver tab wilee-nilee: so like "killall X" from the terminal, then restart X? 82157476af
