What is the difference between presidential primaries, caucus primaries, and general election primaries?.. In all general election primaries in a political party presidential election in a state (or parts of two states, the Republican Party's primary and Democratic Party's primary) that were held on or after November 24, 2012, a nonvoting candidate who received 1% or less votes in the presidential primary election was determined to be a candidate for President of the United States, for whom the voters of the State, the district/locals of the State, are entitled to vote. In a caucus primary (convention primaries that included all Democratic or Independent-voted legislators, governors, and the President), the primary vote was determined by the voters of the district/locals participating in any caucus/riding party-sponsored election held as part of a special election.
